Advancing Copper Opportunities in Tier-1 Jurisdictions

COPPER
Critical Mineral

TIER-1
Jurisdictions

”

INTRODUCTION

Our Mandate

Copper has become one of the most strategically important metals in the global economy, driven by electrification, infrastructure expansion, and rising energy demand. At Brutus Mining, our focus is on identifying and advancing high-potential copper opportunities in strong jurisdictions positioned to benefit from this long-term structural supply deficit.

Investment Highlights

Dual-Sector Exposure

- Copper is a critical metal for electrification, EVs, and grid infrastructure
- Direct exposure to large-scale macro trends tied to the energy transition and industrial demand
- Positioned to capitalize on growing global demand for critical minerals

High-Impact Asset Portfolio

- District-scale land packages with multi-target discovery potential
- Early-stage assets offer significant asymmetric upside
- Modern exploration techniques yet to be applied to key targets

Experienced Leadership

- Combined expertise across capital markets, deal-sourcing & exploration
- Proven track record advancing exploration-stage public companies
- Management is fully aligned through meaningful insider ownership

Structural Supply Deficit

- Global copper deficit is forecast to widen significantly through 2035
- New mine discoveries are declining as permitting timelines lengthen
- Demand from EVs, AI data centres, and grid buildout is accelerating

Tier-1 Jurisdictions

- Operating in stable, mining-friendly regulatory environments
- Strong infrastructure access, including roads, power & communities
- Reduced sovereign and geopolitical risk versus emerging markets

Near-Term Catalysts

- Exploration programs and target generation programs underway
- Drill-ready targets to be defined in the near term
- Active evaluation of additional strategic opportunities

Copper

The Backbone of Modern Infrastructure

2-4×₃

projected by 2040

28Mt₄

Annual demand
by 2030 (IEA)

Copper is non-negotiable for the global energy transition

Sources:

1: International Copper Association (ICA) 2024 2: CRU Group, Copper Market Outlook 2024
3: BloombergNEF EV Outlook 2024 4: IEA, Critical Minerals in Clean Energy Transitions 2024

Why Copper Demand Is Structural, **Not Cyclical**

Copper Intensity by End-Use Application

Essential for electrical wiring, renewables, EVs & grid infrastructure —no viable substitute at scale_{1,2}

Offshore wind requires ~8 tonnes of copper per MW installed —5×more than conventional power₁

EV charging networks add further demand: each fast-charger requires ~0.5 kg of copper wiring₃

Copper — Macro & Price Outlook

Illustrative projection based on IEA & S&P Global data. Assumes current mine pipeline only.

Key Takeaway

The copper market is entering a structural supply-demand imbalance that cannot be resolved by price alone — new mines take 16+ years to develop, meaning the deficit will persist and deepen regardless of short-term price signals.

Chu Chua (Newport Exploration) — inferred resource next door (2021 est.)

CW Property

Option to 100% Interest

Property Overview

Five contiguous mineral claims (2,894.56 ha) located 100 km north of Kamloops in the Clearwater-Vavenby area. Option to earn 100% interest in the CW Property.

Geological Setting

Hosted within Paleozoic metasedimentary and metavolcanic rocks of the Eagle Bay Assemblage and Fennell Formation — a belt prospective for both VMS and structurally controlled gold-bearing vein deposits.

Mineralization Style

Cu-Au ±Ag-Pb-Zn. Five Minfile showings: McCarthy (semi-massive sulphide), Honeymoon & Queen Bess (polymetallic veins), Axel 1 & 2 (disseminated to massive sulphide).

Access & Infrastructure

Excellent year-round access via Highway 5 and existing forest service roads. Kamloops (pop. 98,000) is a regional mining hub with full exploration services and contractors.

Management Team

Team Combines:

· Capital Markets Execution · Exploration Strategy · Deal Sourcing & Growth

**Christos Doulis**
CEO

Mr. Doulis is a seasoned capital markets professional with extensive experience in corporate development, strategic financing, and public company management. He has worked closely with emerging and publicly traded companies across the resource, technology, and industrial sectors, supporting corporate growth initiatives, investor relations, and market strategy. Throughout his career, Mr. Doulis has played a key role in advancing financings, business development opportunities, and corporate positioning initiatives aimed at enhancing long-term shareholder value.

**Ranbir Kalan**
Director

Mr. Kalan has over a decade of experience in capital markets, specializing in corporate development, marketing, and communications. He has supported public companies across the mining, healthcare, green energy, AI, cryptocurrency, and technology sectors, helping execute strategic growth and market awareness initiatives. Mr. Kalan holds a Bachelor's degree in Aerospace Engineering with a minor in Economics from Toronto Metropolitan University.

**Warren Stanyer**
Director

Mr. Stanyer is a veteran exploration executive with over 29 years of experience in the mining industry, specializing in uranium and nickel exploration within the Athabasca Basin, as well as gold, copper, cobalt, and lithium exploration in Nevada. He previously served as President and CEO of Northern Continental Resources and ALX Resources Corp., and was a director of Alpha Minerals Inc., co-discoverer of the Patterson Lake uranium deposit. Mr. Stanyer also played a key role in Alpha's sale to Fission Uranium in 2013 and later served as a director of Fission Uranium. He currently serves as CEO and Director of Nevada Sunrise Metals Corp. (TSXV: NEV), and as President and a director of Greenridge Exploration Inc. (CSE: GXP).

**Simon Tso**
Chief Financial Officer

Mr. Tso is the principal of Athena Chartered Professional Accountant Ltd., a full-cycle accounting firm that assists both private and public companies with their financial reporting, regulatory filing and taxation requirements. Mr. Tso is also a co-founder of Zeus Capital Ltd., a boutique corporate finance firm that specializes in providing financial advisory, valuation and consulting services. Prior to his current roles, Mr. Tso spent a number of years as an associate at a local corporate finance firm and as a senior accountant at a firm of chartered accountants, where he managed numerous private and publicly-traded corporations, commonly acting as their Controller or Chief Financial Officer. Mr. Tso graduated with a Bachelor of Commerce (Finance) degree with honours from the UBC Sauder School of Business and is both a CFA Charterholder and a Chartered Professional Accountant.

WARNING

This management presentation was prepared as a summary overview only of the current affairs of Brutus Mining Inc. (the "Company" and "Brutus Mining") and was not prepared for the purpose of assisting prospective investors in making a decision to invest in any security. The Company does not make any representation as to the completeness, truth or accuracy of the information contained in this presentation. The Company expressly warns readers not to rely on this information for investment purposes. The information contained herein is not and should not be construed as either a public or private offer or solicitation to purchase securities in the capital stock of the Company, nor as legal, financial or tax advice. The reader is referred to their professional legal, financial and tax advisors regarding investment related decisions respecting the securities of the Company. No securities regulatory authority or similar authority has reviewed or in any way passed on the accuracy or adequacy of this presentation.

FORWARD LOOKING INFORMATION

Certain statements in this presentation constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and Canadian securities legislation. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or other future events, including forecast production, earnings and cash flows, to be materially different from any future results, performances or achievements or other events expressly or implicitly predicted by such forward-looking statements. Such risks, uncertainties and other factors include, but are not limited to, factors associated with fluctuations in the market price of copper and gold, mining industry risks, recent operating losses, uncertainty of title to properties, risk associated with foreign operations, environmental risks and hazards, proposed legislation affecting the mining industry, litigation, governmental regulation of the mining industry, properties without known mineable reserves, uncertainty as to calculations of reserves, mineral deposits and grades, requirement of additional financing, uninsured risks, competition, dependence on key management personnel, potential volatility of market price of the Company's common shares, dilution and certain anti-takeover effects. Such information contained herein represents management's best judgment as of the date hereof based on information currently available. The Company does not intend to update this information and disclaims any legal liability to the contrary.

No securities regulator has reviewed or approved the contents of this presentation. Readers are cautioned not to place undue reliance on forward-looking statements.
